About us.

The Academy of Construction Technologies (ACT) is a registered pre-apprenticeship training program. Our mission is to create an atmosphere that will inspire students as we educate, train, and prepare them for successful careers in construction. The ACT program provides a pathway for individuals to gain the skills, knowledge, and experience necessary to succeed in the construction industry.

Since 1992 ACT has successfully impacted more than 9,000 high school students. For more than 30 years the ACT program has placed pre-trained ready-to-work students with sponsoring businesses across Central Florida.

Your support will continue a tradition of excellence in education and on-the-job training opportunities for ACT students.

Program Importance

We are in a fight for talent. The declining workforce and skills gap are the biggest concerns for leaders in construction. Companies are looking for new and innovative ways to recruit and retain younger talent.

Being involved with ACT can be a great option to help identify and develop young talent and help show them the future they can have in the industry. Some key program points:

- Students are new to the industry and can be trained on your company's processes.
- Pre-apprenticeships can show students that a great and rewarding career doesn't have to start with college.
- ACT students are covered by a Student Learner Exemption Agreement - allowing them work on construction sites under the supervision of a mentor.
- Students primarily work in the summer, but they can work year-round if their schedule permits.
- Many companies retain their pre-apprentices after graduation.

How It Works

- High School Students enroll in a construction course as part of the school's CTE program.
- Students learn about careers in construction and register for ACT's registered pre-apprenticeship program.
- Students receive classroom instruction that covers a variety of trades and construction skills.
- During the School year, students earn their OSHA 10 and CPR/First Aid certifications.
- At the end of the school year, students in good standing are invited to interview with ACT partner companies at an exclusive job fair.
- Companies provide ACT with a list of students they are interested in.
- Students are informed of company's decision, and ACT connects the student with the company.
- Students go through company's on-boarding and begin their on-the-job training with partner company.
